Other Info

Skills

Computing:

- SketchUp (CAD Modelling)
- V-Ray (Photo-realistic rendering)
- Microsoft (Word, Excel, PowerPoint)
- Photoshop

Practical:

- Qualified Wood-Machinist (All machinery)
- Proficient Model-Maker (Variety of materials)

About Me

I am an ambitious Furniture & Product Designer who is continuously seeking ways to improve the world as we know it. Whether that be in the form of aesthetical betterment, or providing global solutions to problems occurring of the modern day. This motivates me to design both ethically, and ecologically to ensure I too play my part in the protection of planet Earth.

Experience

2017 - 2018

Decathlon | Bike Assembler & General Warehouse Operative

Primarily worked as a bike builder/assembler but also undertook a variety of other warehouse based tasks.

List of tasks/experience:

- Independent & collaborative work.
- Worked well under pressure in the fast paced environment and excelled during the busy period of Winter/Christmas time.
- Assembled and packed a large variety of bikes accurately and on time using a range of tools.
- Use of various tools (Hand tools, power & pneumatic).
- Carried out typical and necessary shift duties in good time and accurately to ensure on-time delivery to consumers.
- Picked and packed large quantities of products accurately and quickly.
- Carried out necessary repairs on bikes efficiently.

-Designing & Making
(Furniture & Product)

Languages

English

Interest

Design (including CAD),
Manufacture (including CAM),
Model making, Fitness/Gym,
Travelling

Others

Design & Development

-General cleaning and clearing tasks to ensure safe working environment (moving heavy objects, pallets and removing any waste/packaging from the area).
-Physical/Labour tasks including loading of heavy items for shipment.

2018 - 2018

Moulton College | Commercial Experience

As part of my three year course at Moulton College, I was able to gain some work/commercial experience while studying.

List of tasks/experience:

- Workshop Maintenance (deep cleaning and safety checks on machines).
- I was responsible to clean out the dust waste gathered in the vacuum chambers of machinery.
- Maintenance of hand tools and equipment such as clamps and chisels. (re-grinding and sharpening of chisels, cleaning and re-lubrication of clamps).
- Required to carry out repairs where required (tools, workbenches).
- Worked in a production line within my class to mass produce a bulk of products. (sanding and finishing of the products).
- I took part in the production of a bespoke furniture item; commissioned by an organisation known as Kelmarsh.

2018 - 2019

Vycron | Bespoke Cabinet Maker

Engaged with a variety of workshop related tasks to produce quality furniture products to high market clientele.

List of tasks/experience:

- Various independent & collaborative work.
- Achieved and produced work at a fast pace while under pressure to meet client deadlines.
- Worked both on-site and in workshop.
- On-site work (contact with clients, delivery of products, construction/fitting and repairs).
- Use of technical drawings.
- Used all workshop machinery/wood machining (including spindle-moulder, surface planer, thicknesses, table/dimension saw, veneer press,

sander, pillar drill & more).

-Assistance with CNC machine.

-General cabinet making tasks (construction and fixing of components & fixings).

-Sanding (from typical wood to very fine grits for paint/polishing).

-Veneering & Edge banding/lipping of boards.

-Metal fabrication (cutting, welding, finishing).

-Specialist finishing (polishing, antique/patina processing of bronze).

Education

2015 - 2018

Moulton College | Diploma

Completed a three year course consisting of wood machining, furniture making, and furniture design & making. I was awarded with grade Distinction for all work.

2019 - 2022

London Metropolitan University | Bachelor's Degree

Currently in the final stages of completing my third and final year at the University.

Design and making of various projects in a vast variety of materials.

Projects

2021 - 2022

LODES Project | Design A Task Light- 'Clessidra'

The first project of my final year at university required me to design and produce a task light to fulfill a specific purpose. Having directed my attention on the issues of which occurred during the Covid-19 pandemic, I decided to focus this project on designing a task light to improve and enhance productivity within the home setting for desk related tasks. This which I had achieved with my desk lamp: 'Clessidra'.

2021 - 2022

Brompton Project | Give A Bike Part A New Use- 'Folding Side-Table'

The second project of my final year required me to give life to an ex-Brompton bike component by designing a new product while incorporating the bike part and considering it as a finished/ready made aspect of the design. I achieved and produced my final piece: 'Folding Side-Table'.

2021 - 2022

Final Major Project | Design A Product To Tackle The Issues Of Remote Working- 'Study Cubby'

The Final Major Project required me to form my own brief and project proposal. Having been heavily affected by the shift towards remote-working during the Covid-19 induced lockdown, I was determined and motivated to focus my project on improving this sector. This was undoubtedly achieved with my final product: 'Study Cubby'.
